REG EXCHANGES

Building Exchanges

Sharing, acquiring and analysing information across your full trade ecosystem

## Key Benefits

Self-Build Smart Documents in Seconds

Digitise your current forms, contracts and questionnaires or design your own from new to fully automate data gathering and contract conclusion, including secure digital signatures.

Integrate Data from Your REG Network

Populate your documents with 'single point of truth' data from your REG Network, reducing inputs from your counterparties, accelerating Exchange completion times and ensuring up to the minute, verified data.

Build Your Audiences

Exchange with just one or millions of counterparties with no change in cost, speed or efficiency all managed through your Exchanges dashboard.

Create a new template

Upload a document
Start with one of your own documents and edit it here

Clone a template
Start with a copy of an existing template

Start from scratch
Start with blank slate

Faster, Smarter, Safer

How It Works

Step One
Build your Exchange from existing documents or create from scratch

Step Two
Integrate REG data to streamline the experience for your counterparty

Step Three
Select connections from your REG Network, or search for businesses worldwide

Step Four
Set Exchange parameters like completion times, reminders and signature requests

Step Five
Send the Exchange to your chosen audience

Step Six
Oversee the Exchange to completion using dashboards and notifications

Regulatory Oversight

Meet governance, risk and compliance requirements whilst speeding up business interactions.

Unlimited Use Cases

From ESR to Consumer Duty, Vendor DD, application forms, questionnaires and contracts.

Rapidly Gather Information

Transform interaction with partners and customers, enhancing the sharing of information.

Power and Protect

The suite of features in REG Exchanges put you in control of counterparty risks and relationships. Faster communication, smarter oversight and safer interaction empowers you to build business.
