

Feature Focus:

Document Exchange Centre

Securely exchange and execute documents and TOBAs

Key Benefits

Fully Automate Agency Documentation

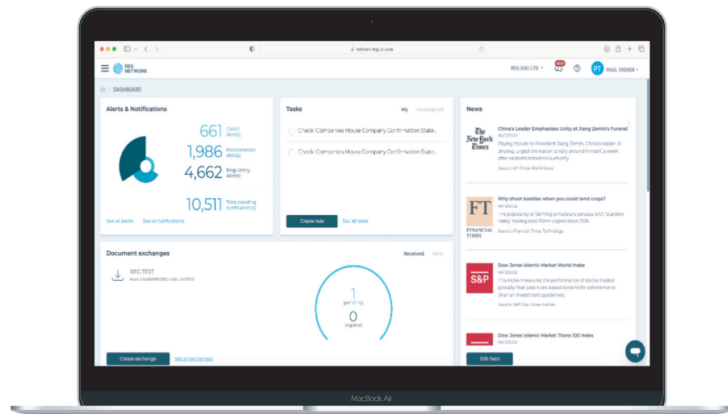

Create documents to send to one or many verified connections for digital signature. Send and update TOBAs and other agreements from templates to ensure your agency relationships are up to date.

Centralised Administration

Record conversations with recipients alongside documents. Create and manage open and completion deadlines and see at a glance outstanding exchanges.

Full Audit Trail

Track the history of all exchanges in one place. Effortlessly review current and previous documents meeting internal and external audit requirements.

Faster, Smarter, Safer

How It Works

Step One

Connect to a company anywhere in the world using the REG Network

Step Three

Upload a document template and request activation for your document to be coded within 24 hours

Step Five

Chase up your outstanding exchanges with quick messages

Step Two

Request company registers with REG (free) or enter their contact information

Step Four

Exchange documents with single or multiple companies and include reminder dates to send automatic alerts

Step Six

Check the summary list to review all previously exchanged documents

Safe & Secure

Protect your data and ensure peace of mind

Improve Efficiency

Faster process for sending documents to multiple companies instantaneously

Time Efficient

Save time and effort by sending thousands of documents simultaneously

Power and Protect

The suite of features in the REG Network put you in control of counterparty risks and relationships. Faster onboarding, smarter assessment and safer oversight empowers you to build business.
